Java & Spring Boot Developer

Enthusiastic Java & Spring Boot Developer with strong knowledge of Spring Core, building RESTful APIs, JWT authentication, Google OAuth2 Login and JPA and Hibernate. Seeking to apply my backend development skills to deliver scalable and secure applications while continuously learning modern enterprise technologies.

Skills

Back-End | Java

Frameworks | Spring Boot, Spring Security, Spring Data JPA, Spring

Security | JWT, OAuth2

Database | MySQL

Unit Test | JUnit, Mockito

RESTful APIs Tester | Postman, Talend API Tester

RESTful APIs Documentation | SwaggerUI

Version Control System | Git & GitHub

Tools & Other Technologies | Docker, React, Node.js

Deployment | AWS, Github Pages

Project

Todo App with JWT Authentication - GitHub Link

- Developed a full-stack task management app with Spring Boot REST API and React.
- Implemented JWT-based authentication & authorization for secure login with signup.
- Designed and optimized CRUD operations for creating, updating, deleting, and viewing todos.
- Integrated MySQL database with Spring Data JPA for persistence and scalability and h2 database is commented.
- Tech Stack: Java, Spring Boot, MySQL, JWT, React, Docker, AWS.

Social Media Application (User Posts) - GitHub Link

- Designed RESTful APIs in Spring Boot to handle post management and user interactions.
- Integrated Customized Response Entity Exception Handler
- Tech Stack: Java, Spring Boot, MySQL, JWT, React, Docker, AWS.

Protfolio

- **Portfolio Website:** Portfolio Link
- **GitHub:** GitHub Link

Teaching

Experienced java teacher with a proven track record of implementing innovative teaching methods. Link

Education

United International University - UIU, Dhaka   Completed at Jan 2024
B.sc. in Computer Science and Engineering

Summary

Seeking to join an ambitious company that values innovation, where I can leverage my technical expertise while continuing to develop my knowledge and potential.
